- Arterial Duplex
- Venous Duplex
- ABI
- Lower Nerve Conduction Study
- Lower Extremity Arterial
- Lower Extremity Venous

Patients' and Payors' Acceptance is High.

Multiple studies clearly show that patient satisfaction comes from deeper physician engagement. Due to declining reimbursements, increased documentation requirements and better outcomes demanded by payors, you're being squeezed. By implementing imaging, you can provide better prevention, higher quality of care, higher level visits and increased practice revenue.
